Ms Li Hsing Lim	B International Hotel & Tour Mgmt
Ms Yiwen Yvonne Loh	B Science
Mr Xing Quan Nicholai Tan	B Commerce

**UQ congratulates these students and wishes them further success in their studies, and a bright career.**

## Terence Tan, Bachelor of Marine Studies

"The decision to further my studies at The University of Queensland was not a very difficult decision to make, as the university boast a longstanding history of academic excellence in the field of Marine Sciences. It is among the world's leading universities in the fields of biological sciences and marine studies.

"The University's School of Biological Sciences boasts an impressive team of professional academics from a wide range of marine study fields. Despite their busy schedules apart from teaching, they are more than willing to share their knowledge with us and offer help and advice whenever required.

As UQ is a very research oriented institution, I am constantly being exposed to current research and issues in the field of marine studies. A huge range of tropical marine environments, rich in marine biodiversity, can be found in Queensland including in and around Brisbane. Hence, courses often require us to move out of the classroom, into the field to experience first hand what marine science is all about! This is an experience found nowhere else in the world!"
