Creating Tomorrow Sustainability Engagement & Well-being | Sustainability@TP

Nurturing our people and uplifting communities

We champion sustainability initiatives with a focus on the wellness, development and safety of our stakeholders, while also contributing to positive social impact initiatives within the wider community.

TP-ECollab Symposium: Enabling Green Resilience

On November 7, 2023, Temasek Polytechnic welcomed over 500 participants to the inaugural TP-ECollab Symposium: Enabling Green Resilience. TP-ECollab, a combination of “TP”, and the words “eco” and “collaboration”, was established to underscore TP’s commitment to partnering with both the public and private sectors in advancing green and sustainability practices.

The symposium featured sustainability veterans Dr. Bicky Bhangu, President of UN Global Compact Network Singapore, and Ms. Esther An, CSO of City Developments Limited, alongside six other industry speakers. They shared practical insights and tips to empower SMEs on their sustainability journey. Mr. Wallace Lim, TP’s CSO, outlined TP’s sustainability efforts and initiatives across its five pillars: Strategy & Compliance, Facilities & Operations, Academic Curriculum, Sustainability Research, and Engagement. Additionally, TP commemorated eight MOUs with industry partners to collaborate on sustainability projects.

Attendees were also treated to a specially curated alternative proteins tea break, featuring delights such as the Eco-Okara Wholemeal Rendang Buns served with sustainable edible spoons. A highlight of the event was the Sustainability Showcase, where all six TP academic schools joined forces to exhibit staff, student, and industry partner initiatives and projects, redefining the boundaries of sustainability. The exhibition also utilized existing modular systems designed and created by TP. Finally, all participants went home with a piece of Soapstainable, TP’s in-house produced sustainable soap, further symbolizing TP’s commitment to sustainability.

TP-ECollab was a collective and collaborative effort across the entire TP community, and we take immense pride in its success! Missed TP-ECollab? All speakers’ videos are now uploaded on TP-ECollab 2023: Enabling Green Resilience
