

Neutron partners with visionary manufacturers to develop innovative technology solutions. We provide total parts cleaning and distribution solutions, aiming to be the preferred supplier for semiconductor and related industries.

Job Summary

We seek a committed Sales Engineer to drive sales for front-end process equipment and services, build strong customer relationships, and pursue new business opportunities in semiconductor wafer fabrication, LED, and solar sectors.

Responsibilities

- Develop and execute sales strategies
- Build, manage, and strengthen relationships with assigned customer accounts to ensure customer satisfaction and retention
- Identify and pursue new business opportunities to expand market presence and increase sales pipeline
- Prepare and deliver timely sales activity updates and accurate sales forecasts to support business planning
- Collaborate with internal teams and customers to understand technical requirements and provide appropriate solutions
- Travel domestically and internationally as required to support sales activities and customer engagements

Preferred competencies and qualifications

- Diploma or Bachelor Degree in Engineering or Science
- Experience in the semiconductor industry is advantageous; fresh graduates are welcome to apply
- Possession of a valid driving license and own car is preferred for travel convenience

Why Join Us

- Opportunity to work with leading semiconductor technologies and global partners
- Exposure to regional customers and international business environment
- Career growth and development opportunities

If you are passionate about technology and enjoy building customer relationships, we invite you to join us and grow your career with Neutron. Interested applicants are invited to email their detailed resume to hr@neutrontech.com.sg.
