1. JOB DESCRIPTION

Job Title

Site Engineer

Occupation

CIVIL ENGINEER (BUILDING
CONSTRUCTION)

Job Description & Requirements

Site Supervision and Coordination

- Supervise and coordinate day-to-day site operations, including subcontractor works, ensuring strict adherence to safety, quality control, and work schedules.
- Monitor and assess the daily progress of work on-site, identifying potential delays or issues, and implementing necessary corrective actions to keep the project on track.
- Ensure efficient mobilization of manpower, and coordinate the planning, ordering, and delivery of materials required for the project.
- Oversee and ensure the proper execution of project works according to design specifications, plans, and relevant regulations.
- Produce and prepare monthly progress reports for in-house, owner, and consultant submissions, highlighting key achievements, milestones, and any challenges.
- Compile weekly site progress reports and any necessary submissions, ensuring accurate updates on the project status.
- Attend site meetings and conduct regular inspections to assess work progress and ensure adherence to quality control requirements in line with authority guidelines.

Requirements:

- Minimum of a Degree in Civil Engineering or a related field, recognized by the Professional Engineers (PE) Board, or a qualification/degree in a relevant field.
- At least 2 years of engineering experience
- Proven experience on projects of similar scale, nature, and complexity, particularly in Civil Engineering projects.
- Prior experience working on construction sites, ensuring high standards of workmanship and safety compliance.
- Fresh-graduate are welcomed to apply.
