breaking boundaries
creating connections
Today’s economic and political realities dictate that the world is indeed the real playing field. As a key contributor to the manpower development of the nation, Temasek Polytechnic is deeply aware of the critical need for it to understand and engage this phenomenon. Within and outside our domestic domain, we break boundaries, build bridges and create new connections, linking us all in an ever-tightening web of learning and growth. At the same time we continue to expand our individual and collective experiences and accomplishments.

mission
To prepare school-leavers and working adults for a future of dynamic change, with relevant knowledge, life-long skills, character, and a thirst for continuous improvement.

vision
To be a world class institution in the global education network, reputed for our programmes, applied research, managerial excellence and innovative corporate culture.
chairman’s message

When TP was established in April 1990, the imperative was to bring polytechnic education to the next plane. TP did so not by doing more of the same but by breaking new ground. For example, it offered design education at the polytechnic level for the first time. TP has since continued to not only offer industry driven courses, but with delivery methods that develop in students values and skills that would make them more agile and resourceful.

In this connection, I am pleased to note that TP was recognised for its innovation with the award of The Enterprise Challenge Shield in November 2003 by the Prime Minister’s Office for its contribution in developing a Problem-Based Learning model.

Teaching and learning approaches that help students meet the challenges of a globalised economy are all the more important today as economic reforms and growth in the region as well as in China and India have unleashed vast opportunities in international businesses, investment and employment. Singaporeans, especially the younger lot, should seize these cross-border opportunities. They should be prepared to travel or relocate overseas to gain first-hand experience of the working and living environment, culture and business practices in these markets.

To prepare its students to enter a new-generation workforce that transcends borders, Temasek Polytechnic has consciously focused on growing its network of connections. The aim is to expand the scope of strategic collaborations and enable yet more students to be sent abroad for industrial attachments and educational trips to widen their exposure and instill in them an international outlook and mindset. Likewise our teaching staff can gain from working with partners in the network.
Exciting times are ahead. As TP commemorates its 15th Anniversary in the coming year, my Board members and I are confident that the pioneering spirit in TP will continue. I would like to thank our industry partners for their support and commend the Polytechnic's staff for their commitment and dedication.

Liew Mun Leong
Chairman
Board of Governors

In an increasingly boundaryless world, new business models and market opportunities have emerged for many sectors, including education. To take advantage of these opportunities to grow the education sector, the latter should continue to be internationalised. To this end, educational institutions in Singapore need to collaborate and share resources and expertise; cultivate strategic partnerships and linkages with internationally renowned institutions to gain market access; constantly innovate and refresh our education content to meet consumer needs; and to uphold quality delivery to maintain market leadership.
Every review affords an opportunity for reflection about the past and contemplation about the future. What has the past taught us and what hopes do we hold for the future? In a word, it is all about change - enabling and engaging change and its concomitant uncertainty and unpredictability.

A single event comes to mind in retrospection, and that is the SARS crisis. It was sudden, disruptive and preoccupied much of our time and mind. In the midst of it all, the challenge was to overcome the sense of fear and go about our business as usual. To borrow the words of Nietzsche, a philosopher, “what doesn't kill us makes us stronger”. SARS became a rallying point both nationally and organisationally. The SARS episode has driven home the point on life's unpredictability and yet brought about a galvanising effect on the organisation. I am grateful to all TP staff for pulling together during the difficult period, taking on additional duties and responsibilities in combating SARS apart from their business as usual responsibilities.

At Temasek Polytechnic, we recognise that business as usual cannot be as usual. We have to constantly improve and do better and better and at the same time, be engaged in a process of purposeful renewal. In concurrently operating in a ‘business as usual’ and ‘business transformation’ mode, our primary focus will be on enhancing student experiences, enhancing graduates employability and enhancing our intellectual and human capital. Our endeavour is to create a responsive, challenging and supportive environment for engaged and purposeful learning, one that will stir up a spirit of innovation and enterprise and a passion for excellence.
As we soldier and sojourn on, we have to brace ourselves to expect the unexpected. TP will continue to strengthen our external partnerships, both local and international, to create synergy and leverage resources. More opportunities will be created for staff and students to be sent abroad to gain first hand exposure of the developments unfolding around us. Increased interaction with the communities that we serve will ensure that TP remain relevant with the changing times.

On the achievement front, I am glad to report that our staff and students have done us proud with their fair share of awards, medals and prizes in their fields of discipline in both local and international competitions. We applaud not just those who emerged victorious, but also those who persevere and give of their best in fighting the good fight.

A special word of thanks goes to Mr Liew Mun Leong, Chairman of TP Board of Governors, members of the Board of Governors and School Advisory Committees, and industry partners for their contribution, guidance and support. I would also like to thank our colleagues for their commitment, dedication and hard work in seeing us through an enriching year.

highlights of the year in review

17 & 19 April 2003
For the fifth year running, TP emerged champion at the Odyssey of the Mind (Singapore) national competition. The team represented Singapore at the World Finals held at the Iowa State University, USA, in May 2003, competing at the collegiate level.

27 May 2003
TP was successfully converted to the ISO9001:2000 standard for the design and delivery of its full-time diplomas.

19 – 22 June 2003
A TP student, Chua Ka Yick, won a Silver Medal in the Information Technology Software Applications category of the World Skills Competition 2003 in St Gallen, Switzerland.

1 July 2003
TP hosted the Singapore Armed Forces Day Combined Rededication Ceremony for the fifth time. One of five centres island-wide, the event at TP was held for the Bedok/Tampines area with Professor Yaacob Ibrahim as the Guest of Honour.

8 July 2003
David Leisinger of the Temasek Design School won the prestigious British Design & Art Direction 2003 Student Awards for Website Design.

22 July 2003
TP hosted a half-day Industry Networking Seminar in which more than 100 key industry leaders participated.

23 July 2003
A Memorandum of Agreement was signed with Sentosa Leisure Group to formalise the framework for the joint development of the Tourism Academy at Sentosa - the first such institution in Asia to be situated in a resort destination.

28 August 2003
For the third consecutive year since the inception of the Crowbar Awards, Temasek Design School emerged as the unrivalled winner, taking the Best of Show in three out of four major categories.

17 September 2003
TP hosted a visit by Minister of State for Education, Mr Chan Soo Sen and Second Permanent Secretary, Ministry of Education, Mr Lim Chuan Poh.

7 October 2003
For its well-received staff wellness programmes, TP was again presented the Singapore H.E.A.L.T.H. Award (Silver) for the fifth consecutive year from the Health Promotion Board.

10 October 2003
TP was one of five organisations which received the StaR Award from SPRING Singapore for significant contributions to the development and promotion of standards and its related activities.

1 November 2003
TP was the only educational institution to receive the SHARE Platinum Award & Five-Year Outstanding Share Award from the Community Chest of Singapore.

13 November 2003
TP was awarded The Enterprise Challenge Shield for its Educational Innovation in developing a Problem Based Learning Model.

27 February 2004
Staff and students from the Diploma in Hospitality & Tourism Management received the Best Innovative Book in English (Rest of the World) title at the prestigious Gourmand World Cookbook Awards 2003 for their cookbook entitled "Cooking Up A Dream". This was the first time a cookbook published in Singapore and written by Singaporeans has won the award.

8 March 2004
TP signed an MOU with the University of New South Wales (UNSW), paving the way for further collaborations by both institutions. An outcome of this was that TP’s Design graduates can gain direct admission to the third year of the UNSW’s four-year degree programmes in fine arts, media and communication, with an option of continuing to a Master’s degree. This enables the graduates to attain the qualification within three years instead of the usual six needed.
Close collaborations with key industry partners help us nurture win-win relationships, in order to support and contribute to the changing demands of the new economy.
forging ties

strengthening links with industry partners
This year, TP garnered numerous significant partnerships, formalised through the signing of various Memoranda of Understanding (MOU) and agreements. These included those covering partnerships for training, staff and student exchanges, research and development programmes and software usage, publishing and non-disclosure. Several of these collaborations between TP and key industry players push the development of capabilities in specialised fields.

The Tourism Academy at Sentosa will be Asia’s first hospitality, leisure and tourism institution situated in a resort setting. Its establishment was sealed with a Memorandum of Agreement signed between TP and the Sentosa Leisure Group on 23 July 2003. Scheduled to admit the first intake of students in December 2004, the Academy marks a new and exciting phase for TP in having a satellite campus set in the most apt setting of Sentosa island.

A three-year project undertaken jointly with the Agri-food and Veterinary Authority of Singapore (AVA) on the Hydroponic Orchid Growth System was completed in December 2003. With the AVA, TP co-hosted a Growers’ Seminar for orchid growers on 24 September 2003 to introduce the innovative growth technology developed by the project team to these users. In March 2004, licensing agreements were signed with one major orchid grower and a biotechnology research company to carry out commercial production using the growth technology.
A television production agreement was signed by Temasek Business School with Dr Ivan Polunin, who filmed Singapore life extensively in the 1950s and 1960s. Signed in October 2003, the agreement sought to involve students in the production of a series of videos on Singapore’s history using his rare footage. Plans are underway to market these productions for telecast.

Temasek Applied Science School is seeking to make its mark as a leading research group in the field of Traditional Chinese Medicine (TCM). Its capability development was boosted with a Research and Collaboration Agreement signed in November 2003 with the Biochemistry Department of the National University of Singapore and the Singapore College of Traditional Chinese Medicine to work on joint TCM research, with funding support from the Singapore Totalisator Board.
A continuing dialogue between industry and TP strengthens the symbiotic relationship. TP keeps its staff and students abreast of industry trends and best practices by tapping on the valuable insights and experiences of key industry leaders. Throughout the year, experienced industry leaders drawn from members of the Board of Governors, School Advisory Committees and leading companies took to the stage to engage staff and students in sharing sessions and dialogue. New platforms for such exchanges will continue to be developed as TP stays on course in navigating new socio-economic developments and trends.

Mr Liew Mun Leong, President & CEO of CapitaLand Ltd and Chairman of TP’s Board of Governors, addressed the audience at the inaugural Industry Networking Seminar held on 22 July 2003. He urged the continuation of such dialogue and forging of closer ties between TP and industry leaders for mutual benefit. The Seminar carried the theme “Partnership for Educational Excellence”, and saw some 100 captains of industry participating.

TP has an on-going programme in bringing respected industry leaders to the campus to speak on their respective fields of specialisation. Among these is the Design Unplugged Series, organised by the Temasek Design School. The inaugural lecture held on 17 October 2003 was given by renowned Italian architect and industrial designer, Mr Perio Lissoni.
Students as well as staff benefit greatly from the experience of industry practitioners, frequently shared at talks organised on campus. In one such session, Dr Ernest Kan, Partner and Head of Learning from Deloitte and Touche, spoke to TP’s Accounting & Finance staff and students on “Going Concern Review and Audit Finalisation” in September 2003. Dr Kan is also the author of the primary auditing textbook used by final-year students of this subject.

One of the stages for dialogue between TP and industry is the Board of Governors Lecture Series which was launched in February 2003. In this review year, two more Board members were invited to deliver lectures to students and staff. The first was Mr Seah Moon Ming, President of ST Electronics, who presented on “Innovation” on 14 October 2003. On 17 March 2004, Mr Zulkifli Baharudin delivered the third lecture entitled “Changes to World Order and Singapore’s Response”, enlightening the audience on the lessons he had learnt from conducting business overseas.
As an educational institution, TP has to develop effective teaching and learning pedagogies, as well staff development strategies to remain relevant not only for now but into the future.
transcending boundaries
nurturing staff and student capabilities
In November 2003, TP received The Enterprise Challenge Shield from The Enterprise Challenge, Prime Minister’s Office, for its proposal of an “Education Innovation for the Knowledge-Based Economy: Development of a Problem-Based Learning (PBL) Education Model". This award recognises the most outstanding team whose project has created the highest new value to the Public Service. The project must have been successfully tested and must have service-wide application. Winning the award is an endorsement of TP’s pioneering endeavours in PBL innovation.

TP actively seeks to nurture an entrepreneurial mindset among its students. An Entrepreneurship Task Force was formed in August 2003 to provide further impetus and consolidate initiatives and education in entrepreneurship. This effort is focused on providing an environment for students to imbibe entrepreneurship values in classroom settings, industry-related projects, co-curricular activities and events. One related activity is the “Rent-A-Cart” scheme where students get to rent a retail cart on campus for a nominal sum to try out their business ideas. This programme has received overwhelming response from students.
Cross-disciplinary subjects are offered at TP to provide our students with a broader worldview and insights into different disciplines. They are given opportunities to cross the boundaries of their core disciplines and become more flexible and adaptable learners. Within a flexible academic architecture, TP students get to study subjects offered by other Schools as well as the Interdisciplinary and General Studies Department, such as arts appreciation, foreign languages and cultures, and creative writing.

TP students are also given opportunities to partner with industry in projects. This exposes them to industry standards and stretches their abilities. In July 2003, an exhibition was held at Takashimaya Department Store, showcasing the results that TP’s product and industrial design students had produced in collaboration with X-tra Living Pte Ltd in creating lifestyle accessories inspired by works of international design firms such as Magis and Alessi.
The success of an organisation lies in the talent and dynamism of its human resource. TP’s challenge is to attract, develop and retain the best talents both in the academic and administrative fields.

TP has been certified a People Developer organisation since September 1999. In this review year, average learning hours per staff was 120 hours, exceeding the target of 100 hours. A total of 24,857 learning places were provided in-house to complement the various external programmes offered. On average, each staff in TP had 23 training places this year as compared to the 16 places offered in the previous year.

One of the key focuses for the Human Resource and Staff Development Department was its staff communication programme. Dialogues and communication sessions were held throughout the year to keep staff up-to-date on the learning direction and developments of the organisation.
“On Tennis, Dancing & Teaching: Pedagogies in New Times” - the title of the lecture delivered by Professor Allan Luke, Dean of the Centre for Research in Pedagogy and Practice, National Institute of Education, at TP’s Staff and Educational Development Division Fest. The event, held in October 2003, also saw 117 staff graduating from the Teaching in Higher Education Certificate course, which all academic staff in TP undergo.

TP firmly believes in the overall wellness and personal development of its staff. For its efforts, TP was presented with the Singapore H.E.A.L.T.H. Award (Silver) for the fifth consecutive year from the Health Promotion Board in recognition of its staff wellness initiatives and a high staff participation rate of 91 percent this year.
In order to remain relevant in the global education network, TP aims to enhance its global presence by developing new capabilities and setting high academic standards with partners beyond Singapore.
expanding frontiers
cultivating global friendships
TP actively seeks out new partners across the world to learn from and share its knowledge and capabilities, while giving its staff and students the all-important global perspective on personal, academic and corporate development. In the review year, several overseas trips were undertaken by staff to develop broader networks of partnerships, enhance knowledge in their fields of specialisation and share their expertise with others.

TP signed an MOU with the University of New South Wales (UNSW) in March 2004, paving the way for further collaboration between the various disciplines offered by the two institutions. An outcome of this was the direct admission offered to TP’s Design graduates to the third year of their four-year undergraduate programmes at the UNSW’s Faculty of College of Fine Arts (COFA). Following that, graduates have the option to complete the Master’s programme in 12 months instead of the usual 18. In effect, this enables the graduates to attain the qualification within three years instead of the usual six years needed.

In this review year, TP staff went to the United Kingdom, Japan, India and China to establish links and tap on the dynamic growth and consequent opportunities available in these countries. This included being part of IE Singapore’s trade and investment mission to India in December 2003 to explore opportunities in the fashion industry there. TP staff also continued to be sent overseas for training as well as industrial attachments.
TP has provided its expertise and shared its experience at the invitation of Singapore's Ministry of Foreign Affairs since 2002 by conducting courses in tourism, IT and language and communication in Cambodia, Laos, Myanmar and Vietnam. This is part of the Singapore Initiative for ASEAN Integration (IAI), an effort to narrow the development gap in the ASEAN region. In this review year, a total of 16 such training programmes were completed by 22 staff members. Under this programme, TP also hosts lecturers from these countries on training attachments.
In this review year, 4,055 TP students went on internships, both locally and abroad. This gave them the opportunity to be tested under “real” conditions while learning new skills. Overseas, our students gained valuable cultural experiences and insights to work practices in different environments. In spite of the SARS outbreak, several overseas internships to countries like Australia, India, China, Finland, Switzerland and Thailand were completed.

Cross-cultural interactions promote international understanding and cooperation among nations. Our students are encouraged to broaden their perspective through international exposure within and out of Singapore. Opportunities are provided via cultural exchanges, internships abroad, student exchanges and the presence of international students on campus.
Cultural exchanges provide a platform for TP students to mingle with students from different parts of the world, while showcasing Singaporean hospitality and local culture to them. Students from Japan’s Kumamoto National College of Technology visited TP on one such exchange programme.

TP has constantly supported staff and student exchanges with international institutions as they provide a valuable scope of learning and global experience for both parties. These exchange programmes included 20 students from polytechnics in Finland hosted by TP in this review year.
It is human passion that ultimately drives us towards excellence. The teacher’s passion to impart knowledge, guide and nurture and the learner’s passion to learn, explore and discover are ingredients that drive us to higher levels of achievement.
spurring excellence

enabling student and staff accomplishments
Both in Singapore and abroad, TP students pushed the parameters of previous achievements and consistently raised the bar on standards of skills and creativity. Some of the achievements highlighted in this Report reflect the strong standing of our students not only vis-à-vis their student counterparts, but also seasoned professionals at times. Carrying the institution-wide belief that the world is the real playing field, our students brought home awards and top placements on a number of occasions in this year of review.

The cookbook entitled “Cooking Up A Dream”, produced by students and staff from the Diploma in Hospitality & Tourism Management, won the Best Innovative Book in English (Rest of the World) title at the Gourmand World Cookbook Awards 2003. This was the first time a cookbook published in Singapore and written by Singaporeans has won the award.

For the third consecutive year since the inception of the Crowbar Awards, Temasek Design School emerged as the unrivalled winner. In August 2003, the School took the Best of Show in three out of four major categories, as well as most of the top awards in the other categories. Meant to launch and introduce young talents to the advertising and media industry, this annual event has come to be recognised as an excellent springboard for the promotion of young creative talents.
A Temasek Information Technology School student won a Silver Medal in the Information Technology Software Applications category of the World Skills Competition 2003. The four-day competition was held from 19 to 22 June, in St Gallen, Switzerland. This competition, also known as the International Youth Skill Olympics, brought in around 700 competitors from different nations to give proof of their outstanding skills in 40 different vocations.

Temasek Design School students continued their haul of awards at prestigious international competitions. This included the coveted top-prize win in the British Design & Art Direction 2003 Student Awards for Website Design.
TP Engineering students continued their strong showing at the annual Singapore Robotic Games held in May 2003. This is an annual event in which tertiary institutions and secondary schools make use of the latest robotic technologies. Our students won two gold, three silver and four bronze medals in the Gladiator, Robot Sumo, Robot Colony, Legged Robot Marathon and the Open categories.

For the fifth year running, TP emerged champion at the Odyssey of the Mind (Singapore) national competition held in April 2003. The team overcame 13 others from tertiary institutions, junior colleges, and secondary schools. They then proceeded to represent Singapore at the World Finals held at the Iowa State University, USA, from 28 to 31 May 2003, competing at the collegiate level.
Communications & Media Management students produced an eight-part mini-documentary series for NewsRadio 93.8FM on topics related to doing business in China. The first instalment of the series, entitled “Entering the Dragon’s Gate,” was broadcast on 9 March 2004.

TP students are also encouraged to excel in their service to the community. In this year, an engineering student volunteered more than 150 hours of her time towards helping the public to e-file their income tax returns. For this, she was presented with one of the five first-ever eAmbassador awards given by the Commissioner of the Inland Revenue Authority of Singapore.
In response to the SARS outbreak, a group of Engineering staff pooled their knowledge and resources to develop the “Temperature Badge” during the peak of the outbreak in April 2003. The device, which is a thermometer to be worn on a lanyard, comes with flashing lights to indicate that the wearer is fever-free. It was distributed to staff and students in 2003 to be used in the event that temperature-monitoring is required. The technology has been licensed to Singapore Technologies Electronics Ltd.

A collaboration with the Singapore Police Force and ADtranet Pte Ltd saw the creation of a multi-user 3D game by Temasek Engineering School in March 2004. The game will be used by the Police Force as an outreach tool to introduce key community messages to today’s youths in a fun and entertaining way.

Active collaboration between TP and industry resulted in opportunities for applied research and the development of projects that benefit both parties, as well as the community at large.
A project with the National University of Singapore, the Sky Rail Automatic Gondola System involved the development of a movable platform that can perform various types of servicing jobs such as inspecting, painting and doing repair work on the outer walls of high-rise buildings. This project aims to serve HDB town councils and high-rise building maintenance agencies by helping to reduce water consumption and providing a safer work environment.

TP staff also collaborated with the National University of Singapore, National University Hospital and OsteoPore International Pte Ltd in developing the Polycaprolactone Scaffold - a three-dimensional porous structure that has the ability to enable cellular tissue growth, and is used to help bone regeneration. Beyond developing the product, the parties involved are also exploring the various parameters in the process of fabricating and testing the scaffold.

Note:
This is only a listing of universities and professional bodies which have given advanced standing and accreditation to Temasek Polytechnic in writing. TP students are advised to check with the relevant professional bodies and government agencies on recognition of the qualification before deciding on a university of choice.

#As a general rule, for North American universities that do not enter into institutional agreement with us on credit exemptions and transfer arrangements, most of them welcome applications from TP students who will be evaluated on a case-by-case basis.

financial statements
We have audited the financial statements of Temasek Polytechnic (the “Polytechnic”) for the year ended 31 March 2004 as set out on pages 56 to 77. These financial statements are the responsibility of the Board of Governors of the Polytechnic. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements for the year ended 31 March 2003 were audited by another firm of Certified Public Accountants whose report dated 25 June 2003 expressed an unqualified opinion on those financial statements.

We conducted our audit in accordance with Singapore Standards on Auditing. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Board of Governors, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion:

(a) the financial statements of Temasek Polytechnic are properly drawn up in accordance with the provisions of the Temasek Polytechnic Act, Cap 323A (“the Act”) and Singapore Financial Reporting Standards with such modifications and exceptions as stipulated in the Finance Circular Minute No. M44/2003 dated 31 October 2003 issued by the Ministry of Finance and on such basis present fairly, in all material respects, the state of affairs of the Polytechnic as at 31 March 2004 and the income and expenditure, changes in accumulated surplus and cash flows of the Polytechnic for the year ended on that date; and

(b) the accounting and other records required by the Act to be kept including records of all assets of the Polytechnic whether purchased, donated or otherwise, have been properly kept in accordance with the provisions of the Act.

During the course of our audit, nothing came to our notice that caused us to believe that the receipt, expenditure and investment of monies and the acquisition and disposal of assets by the Polytechnic have not been carried out in accordance with the provisions of the Act during the year.
## temasek polytechnic statement of income and expenditure

</table>

The accompanying notes form an integral part of these financial statements.
These notes form an integral part of the financial statements.

The financial statements were authorised for issue by the Board of Governors on 25 June 2004.

1. Domicile and Activities

Temasek Polytechnic (the Polytechnic) was established in 1990 under the Temasek Polytechnic Act (Chapter 323A). It is domiciled in the Republic of Singapore and its campus is situated at 21 Tampines Avenue 1, Singapore 529757.

The principal activities of the Polytechnic is to provide instruction, training and research in technology, science, commerce, arts and other subjects of learning.

2. Summary of Significant Accounting Policies

(a) Basis of Preparation

The financial statements are prepared in accordance with Singapore Financial Reporting Standards (FRS) including related Interpretations promulgated by the Council on Corporate Disclosure and Governance (CCDG) and the applicable requirements of Temasek Polytechnic Act, Chapter 323A.

The financial statements were previously prepared in accordance with Singapore Statements of Accounting Standard (SAS). The effect of the transition from SAS to FRS on the financial statements is not significant.

The historical cost basis is used and amounts are expressed in Singapore dollars, unless stated otherwise.

(b) Recognition of Income

Tuition and other fees for an academic year are recognised over the period of service in a financial year.

Revenue for self-financing courses/projects are recognised based on percentage of completion, determined on a straight-line basis over the period of the courses/projects.

Interest income is recognised on an accrual basis.

(c) Grants

Government grants and contribution from other organisations utilised for the purchase of depreciable assets and donated assets at valuation are taken to the Deferred Capital Grant Account. The deferred capital grants are recognised in the Statement of Income and Expenditure over the periods necessary to match the depreciation of the assets purchased with the related grants.

Government grants to meet the current year’s operating expenses are taken to the Statement of Income and Expenditure for the year.

Government grants are accounted for on an accrual basis.
2. Summary of Significant Accounting Policies (cont’d)

(d) Funds

General Fund
Income and expenditure relating to the main activities of the Polytechnic are accounted for through the General Fund in the Statement of Income and Expenditure.

Restricted Funds
Income and expenditure relating to funds set up for specific purposes are accounted for through the Restricted Funds in the Statement of Income and Expenditure.

The assets and liabilities of these funds are accounted for separately. However, for presentation purposes, they are pooled together with the other assets and liabilities of the Polytechnic in the Balance Sheet.

(e) Subsidiaries

Subsidiaries are companies controlled by the Polytechnic. Control exists when the Polytechnic has the power, directly or indirectly, to govern the financial and operating policies of a company so as to obtain benefits from its activities.

Investments in subsidiaries are stated in the Polytechnic’s balance sheet at cost less impairment losses.

(f) Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Donated assets are recorded at valuation as their cost base. Depreciation is calculated on the straight-line method to write down the cost of the property, plant and equipment over their estimated useful lives as follows:

- Leasehold land: Remaining lease period
- Leasehold building: 50 years
- Building improvements: 5 years
- Plant and machinery: 10 years
- Furniture, fittings and equipment: 5 years
- Computer hardware and equipment: 3 to 5 years
- Workshop equipment and machinery: 5 to 10 years
- Vehicles: 5 years

Property, plant and equipment costing less than $2,000 are written off to the Statement of Income and Expenditure in the year of purchase.
2. Summary of Significant Accounting Policies (cont’d)

(g) **Impairment**

The carrying amounts of the Polytechnic’s assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. The impairment loss is charged to the Statement of Income and Expenditure.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

(h) **Investments**

Debt and equity securities held for the short term are stated at lower of cost or market value.

Gains and losses on disposal of debt and equity securities are taken to the Statement of Income and Expenditure.

(i) **Cash and Cash Equivalents**

For the purpose of the statement of cash flows, cash and cash equivalents comprise fixed deposits, cash on hand and bank balances.

(j) **Foreign Currency Transactions**

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year-end exchange rates are recognised in the Statement of Income and Expenditure.

(k) **Operating Leases**

Where the Polytechnic has the use of assets under operating leases, payments made under the leases are recognised in the Statement of Income and Expenditure on a straight-line basis over the term of the lease.

(l) **Provisions**

Provisions are recognised when the Polytechnic has a present legal or constructive obligation as a result of past events and it is possible that an outflow of resources will be required to settle the obligation, and reliable estimate of the amount can be made.

(m) **Employee Benefits**

**Employee leave entitlement**

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to balance sheet date.

**Defined contribution plan**

Contributions to post-employment benefits under defined contribution plan (i.e. Central Provident Fund) are recognised as an expense in the Statement of Income and Expenditure.
3. **Staff Costs**

8. Temasek Polytechnic Endowment Fund

Donations and contributions made to the Temasek Polytechnic Endowment Fund are retained as principal capital to be kept intact to earn income.

Income and expenditure of the fund are taken to “Restricted Funds” in the Statement of Income and Expenditure (Note 7).

9. Staff and Student Loan Funds

(a) **Staff Loan Fund**

This fund, which comprises advances from Government, provides housing loans to staff. The housing loans are managed by a financial institution on behalf of the Polytechnic.

(b) **Tuition Fee Loan/Study Loan Funds**

Tuition fee loan fund, which comprises advances from Government, provides tuition fee loans to students. The tuition fee loans are administered by a financial institution.

Study loan fund, which comprises advances from Government, provides loans to needy students.

The income and expenditure of the above funds are taken to General Fund in the Statement of Income and Expenditure.

  - Tuition fee loans: –, 4,858
  - Study loans: –, 4,375
- **Bank balance**: 515, 430

On 11 October 2001, the Ministry of Education issued a circular stating that with effect from financial year ended 2002/2003, all new staff housing loans should be obtained directly from financial institutions or from the Polytechnic itself instead of from the Government via Staff Loan Fund. Existing housing loans will continue to be borne by the Government until they are fully repaid. Repayment of these loans as well as unutilised funds would have to be returned to the Government. During the financial year, the Polytechnic received repayments amounting to $0.51 million (2003: $0.43 million) from staff.

14. Loans to Staff and Students

(a) **Staff Loans**

The staff loan fund provides housing loans to staff. Housing loans are repayable with interest at 5% per annum by monthly instalments over periods up to 30 years.

(b) **Tuition Fee/Study Loans**

Tuition fee loans are granted to students interest-free until 1 August in the year of their graduation. Thereafter, loans are repayable by monthly instalments with interest based on the average prime rates of the 3 local big banks or such other rate as may be determined by the Polytechnic.

Study loans are granted to students interest-free. Such loans are repayable by monthly instalments within 2 years from the 7th month immediately following the month of the borrowers’ graduation.

<table>

<td>509</td>
</tr>
</tbody>
</table>

Staff loans and tuition fee/study loans are disbursed from advances from the Government and repayment of the loans will eventually be returned to Government.

(c) The Polytechnic bears no credit risk on loans extended to staff and students since the loans were fully funded by government grants.
15. Subsidiary

Details of the subsidiary, incorporated and conducting business in the Republic of Singapore, are as follows:

<table>
<thead>
<tr>
<th>Name of Subsidiary</th>
<th>Percentage Held by the Polytechnic</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2003/04</td>
</tr>
<tr>
<td>TP Innovation Holdings Pte Ltd</td>
<td>100</td>
</tr>
</tbody>
</table>

At the balance sheet date, the Polytechnic had given an undertaking to provide continuing financial support to the subsidiary and made the following provision for losses incurred by the subsidiary:

<table>
<thead>
<tr>
<th></th>
<th>2003/04</th>
<th>2002/03</th>

</tbody>
</table>

20. Taxation

By virtue of Section 13M(2)(b) of the Income Tax Act, Chapter 134, the Polytechnic is exempted from taxation provided 80% of its adjusted income for each financial year is spent for charitable purposes by the end of the following year.

As the Polytechnic had met the 80% spending requirement, no provision for taxation has been made in the financial statements for the current financial year.

21. The Temasek Polytechnic General Education Fund

In November 2002, the Board of Governors of the Polytechnic approved the setting up of the Temasek Polytechnic General Education Fund. The fund was subsequently granted the membership by the Ministry of Education under the Education Central Fund for a period of five years with effect from 1 April 2003. The membership is subject to renewal upon expiry.

Under this membership, the Polytechnic is allowed to issue tax-deductible receipts to donors for donations contributed towards Bursary, Scholarship and Awards Fund, Temasek Polytechnic Endowment Fund and other education related activities which qualify for tax deduction. The Polytechnic has set up a Management Committee to administer the receipts and disbursement of the tax-deductible donations given by the donors.
21. The Temasek Polytechnic General Education Fund (cont’d)

The statement of the tax-deductible donations received for the Bursary, Scholarship and Awards Fund and Temasek Polytechnic Endowment Fund and the disbursements in the financial year is given below:

<table>
<thead>
<tr>
<th></th>
<th>2003/04</th>
<th>2002/03</th>

<td>151</td>
<td>221</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>392</strong></td>
<td><strong>641</strong></td>
</tr>
</tbody>
</table>

23. Appropriation of Accumulated Surplus

The Polytechnic received a memo from Ministry of Education dated 3 July 2002 which confirmed that Ministry of Finance (MOF) had no objection for the Polytechnic to retain the unutilised surplus generated prior to financial year 2000/2001 as working capital.

For the surplus generated from financial year 2000/2001 onwards, the Polytechnic is allowed to retain all funds in accordance with MOF’s circular dated 4 December 2000.
24. Financial Instruments

Risk management is integral to the whole activities of the Polytechnic. The Polytechnic has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The Polytechnic continually monitors the Polytechnic’s risk management process to ensure that an appropriate balance between risk and control is achieved.

Credit risk
Credit risk is the potential loss resulting from the failure of a student or a counterparty to settle its financial and contractual obligations to the Polytechnic, as and when they fall due.

Cash and fixed deposits are placed with banks and financial institutions which are regulated.

At the balance sheet date, there was no significant concentration of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheet.

Liquidity risk
The Polytechnic monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate to finance the Polytechnic’s operations and to mitigate the effects of fluctuations in cash flow.

Interest rate risk
Surplus funds from the Polytechnic’s operations are invested in bank deposits. The Polytechnic’s exposure to interest rate risk relates primarily to the fixed deposits.

Foreign currency risk
The Polytechnic incurs minimal foreign currency risk on sales and purchases as these are predominantly denominated in Singapore dollars.

Fair values
Except for fair value of bonds disclosed in Note 17, the carrying amounts of all other financial assets/liabilities as at the balance sheet date approximate their fair values due to the relatively short term maturity.

25. Comparative Figures

Comparative figures of the financial statements were audited by another firm of Certified Public Accountants. Certain comparatives have been changed to conform with the current year’s presentation.
